👤 Resumen

Full Stack Developer with over 4 years of experience in designing, developing, and implementing web applications. Specialized in Angular and React, with experience in Node.js, TypeScript, and REST API integration. I have worked in Agile (Scrum) teams, collaborating throughout the entire software development lifecycle, from requirements analysis to implementation, maintenance, and continuous improvement. I am committed to writing clean, reusable, and scalable code, with a strong ability to learn and adapt to new technologies.

🧰 Experiencia

Frontend Developer, Lizcore System 07/2024 – 08/2026

- Developing cross-platform applications for the management of climbing gyms and their members.
- Developed reusable components and complete views using Angular 20+ and TypeScript.
- Integrated and consumed REST APIs to communicate with backend services.
- Managed application state using RxJS and Angular Signals.
- Actively participated in Scrum ceremonies, including Sprint Planning, Daily Stand-ups, Refinement, and Retrospectives.
- Collaborated with designers and developers to implement features based on technical documentation while following coding standards.
- Integrated code using Git, participated in code reviews, and resolved software issues.
- Refactored and optimized existing code to improve maintainability and application performance.

Full Stack Developer (Freelance) 12/2023 – 07/2024

- Developed web applications for multiple clients across freelance platforms.
- Built web applications using React, Angular, JavaScript, TypeScript, HTML5, and CSS3.
- Developed and integrated REST APIs using Node.js.
- Consumed and integrated third-party APIs.
- Designed and queried PostgreSQL, MongoDB, and SQL databases.
- Managed source code using Git and GitHub.
- Delivered scalable and maintainable solutions by following software development best practices.

Junior Frontend Developer, Guanaco Software Factory 11/2022 – 12/2023

- Developed back-office applications, complex forms, and modular features across multiple projects.
- Developed and consumed REST APIs.
- Implemented unit tests to ensure software quality.
- Resolved bugs, maintained existing features, and performed code refactoring.
- Collaborated in Agile development teams using Git for version control.

🎓 Educacion

Information Systems Engineering, National Technological University (UTN – Córdoba Regional Faculty) 03/2021 – 11/2022 | Cordoba, Argentina

Completed nearly two years of my undergraduate studies before pausing my degree

Skills

Frontend

- React
- Angular
- Next.js
- JavaScript (ES6+)
- TypeScript
- HTML5
- CSS3
- Tailwind CSS
- Bootstrap
- Angular Material

Backend

- Node.js
- Express.js
- Python
- Django
- APIs REST
- JSON

Bases de datos

- PostgreSQL
- SQL
- MongoDB

Idiomas

- Native spanish
- English (B1)

Herramientas

- Git
- GitHub
- GitLab
- Docker
- Figma
- Cursor
- Claude Code

Certifications

Angular Development & Agile Methodologies (SCRUM)

- Alkemy
- 2022-06

Master in JavaScript: JS, jQuery, Angular, NodeJS

- Udemy
- 2022-04
